

CONCEPT BOILER SYSTEMS

BOILER SHUTDOWN PROCEDURE

1. Open the Blowdown valve for 5 seconds, or until feedwater pump starts, then close.
2. Blowdown all Gauge Glass mounts independently.
3. Turn Fill/Run switch to OFF position.
4. Leave the Main Steam Valve open.
5. Turn Main Isolation switch to OFF if the boiler will be offline for more than a week.
6. Close the Gas Isolation Valve.
7. Close the Feedwater Tank isolation valve between the Tank and Boiler.
8. Boiler is now "Off Line" and isolated.
